

Further Exploration of techniques using Soft Pastels

Jackiewoodsartist.co.uk

Developing techniques used with soft pastels and exploring different mark making will be the focus of this workshop.

This session will enable you to explore different underpainting techniques using inks, watercolour, pastel and isopropyl alcohol alongside different underpainting textures.

Using your own reference photos, thought will be given to planning a painting and then making choices on underpainting and then developing pastel mark making to work towards completing a painting.

Further Exploration of techniques using soft pastels
